

METRICAIR LIMITED

Project & Admin Section Updates

Report Generated: July 10, 2026 • Status: Completed & Remote Pushed

Executive Summary: This document outlines all recent engineering and frontend improvements applied to the MetricAir codebase. Key highlights include the design and integration of a Firebase-controlled Promotional Banner system, custom photo-to-Base64 upload capability within the Admin Panel, hardcoded Store product badges cleanup, and site-wide headings synchronization with the `#FC4F55` brand theme.

1. Site-Wide Headings Styling (#FC4F55)

To establish a clean, consistent color scheme reflecting the brand color palette, all main section headers and page title elements have been assigned unique HTML IDs. Their color styles are forced to `#FC4F55` inside the global CSS overrides file, avoiding generic tags to prevent unwanted styling changes to smaller labels or components.

Modified File & ID Registry

Component File	Target Heading / Section	Assigned HTML ID
<code>ServicesOverview.jsx</code>	Our Core Expertise & Solutions (h2) Residential / Commercial / Industrial subheaders (h3)	<code>metric-services-heading</code> <code>metric-services-res-heading</code> , etc.

Component File	Target Heading / Section	Assigned HTML ID
FeaturedProjects.jsx	Featured Projects section header (h2)	metric-projects-heading
RealWorldApplications.jsx	Quotes & Consultation section header (h2)	metric-quotes-heading
IndustryLeader.jsx	Brands We Work With section header (h2)	metric-brands-heading
GlanceWork.jsx	Glance at Our Work section header (h2)	metric-glance-heading
CapabilitiesAndDirector.jsx	Capabilities (h2) & Message from Director (h2)	metric-capabilities-heading , metric-director-heading
FAQ.jsx	Frequently Asked Questions header (h2)	metric-faq-heading
Store.jsx	HVAC Products & Accessories main title (h1)	metric-store-heading
Aboutus.jsx	About us page main title (h2)	metric-about-heading
Services.jsx	Services main overview page title (h1)	metric-services-page-heading
Contactus.jsx	Contact Us page header title (h1)	metric-contact-heading

Component File	Target Heading / Section	Assigned HTML ID
Careers.jsx	Careers main page header title (h1)	metric-careers-heading
Feedback.jsx	Feedback form main page title (h1)	metric-feedback-heading
ServiceDetails.jsx	Dynamic service details main title (h1)	metric-servicedetails-heading
Datadrivenhvac.jsx	Data-driven HVAC solutions main header (h2)	metric-datadriven-heading
ResidentialElectrical.jsx	Residential Electrical Services (h1)	metric-res-electrical-heading
ResidentialPlumbing.jsx	Residential Plumbing Services (h1)	metric-res-plumbing-heading

2. Admin Panel Improvements & New Subtabs

The Admin Dashboard has been modified to support additional sub-menus, allowing full CRUD uploads of Featured Projects, Glance of Work photos, and Promotional Banners directly into Firestore as Base64 strings.

- **Promotional Banner Management Subtab:** Created a new tab interface inside the Admin Panel. Admins can upload a banner photo (jpeg/png), input a redirect web link, and toggle active status.
- **Base64 File Conversion:** Integrated an asynchronous `FileReader` workflow. When the administrator picks an image file, it is parsed instantly client-side and saved as a Base64 Data URL string in Firebase, avoiding the need for an external cloud storage bucket.
- **Cleaned Seeding Buttons:** The legacy `Seed Projects & Glance (Base64)` button has been completely removed from the dashboard toolbar layout as requested by the user.
- **Login & Logout Buttons Styling:** Assigned explicit IDs (`metric-admin-login-btn` and `metric-admin-logout-btn`) to the authentication triggers, forcing their font color to white (`#ffffff !important`) in CSS.

3. Promotional Banner Feature

A new real-time promotional banner has been added at the top of the homepage route in the React application.

Database Toggle Logic

Whenever an admin toggles a banner to "active", the Firestore write transaction automatically deactivates all other banners in the `promotional_banners` collection. When the active banner is switched "off", it unmounts from the homepage and disappears cleanly.

```
// Example Toggle Logic inside AdminPanel
const handleToggleBanner = async (banner) => {
  const newStatus = !banner.active;
  if (newStatus === true) {
    // Turn off all other banners first
    const activeBanners = banners.filter(b => b.active && b.id !== banner.id)
    for (const b of activeBanners) {
```

```
    await updateDoc(doc(db, "promotional_banners", b.id), { active: false
  }
}
await updateDoc(doc(db, "promotional_banners", banner.id), { active: newSt
};
```

4. Store Page Badges Optimization

Default mockup store badges (such as 'Best Seller', 'Value Pack', 'Popular', etc.) have been completely removed and hidden. Badges will now only render on products if they are explicitly configured and saved in the Firebase Admin Panel.

- **Stricter Badge Filter:** Added defensive rendering checks inside `Store.jsx` to block legacy template badges from showing.
- **ID Styling Overrides:** Assigned IDs (`metric-store-section` and `metric-store-badge`) to the badge wrapper, forcing text colors to white (`#ffffff !important`).

5. Featured Projects & Brands Carousel Adjustments

- **Clean Project Badges:** Featured Projects' location and description text are now moved below the card image as structured badge panels instead of hovering inside the picture.
- **Removed Pagination Indicators:** Brand partner logo carousel dots have been removed, presenting a cleaner sliding strip.

6. Git Push Status

All updates are staged, committed, and pushed successfully to your GitHub repository:

```
$ git status
On branch master
Your branch is up to date with 'origin/master'.
nothing to commit, working tree clean

$ git remote -v
origin  https://github.com/hotaeshwar/metricair.git (fetch)
origin  https://github.com/hotaeshwar/metricair.git (push)
```
